	Network Protocol	TCP/IP
General	Operating Temperature	-10 ~ +60°C / 10 ~ 90%RH (max.)
	Power Input	12VDC
	Power Consumption	Standby < 1.5W / Operation < 7W
	Dimensions	263 x 182 x 16mm
	Weight	1.0Kg

Product Overview

The INTIPMONC is a part of the VIP Vision range of elegant indoor monitors to accompany your IP video intercom solution.

The unit is operated via the resistive touchscreen, with common functions completed quickly via buttons on the front of the monitor. It has a number of features to accompany your IP door station including comprehensive call history logs, DND (Do Not Disturb), audio/video messaging and door station camera live view.

It can connect to your own network and can even be configured to connect to your IP surveillance camera live streams (compressed to monitor resolution). It has 4GB of on-board memory to store saved door station snapshots and audio/video messages and can connect to a maximum of 6 door stations.

The INTIPMON range is also suited to apartment intercom configurations. With inter-room calling between monitors and emergency contact to building management built-in, the INTIPMON range is also suited for apartment intercom configurations.
