

VIP Vision Smart PSS

Multiple Screens with different views.

1. Open the Smart PSS Software
2. Add the live view tab for up to 4 separate views.

3. Left click and hold one Live View at a time then drag the the text out, so it becomes its own window.

4. You can now drag this window over to your other displays/monitors.

If you are using high resolution monitors, or larger displays, you may want to enable Expanding video scale to minimise issues with scaling.
